

# Alana A.

Full-Stack JS Developer • Node.js, React, APIs • Problem-Solver

**Address:** Seattle, Washington, United States of America

**LinkedIn:** <https://www.linkedin.com/in/alanaandres/>

- *Reskill Americans provided hands-on training in backend development, with a focus on Node.js and JavaScript. Previous work as a Front Office Supervisor at Hampton emphasized organizational and problem-solving skills. The individual independently developed a cryptocurrency app using React Native, showcasing a strong interest in mobile and software development. An Associate of Arts in Graphic Design from Everett Community College complements their technical skills, bridging creativity and technology. Additionally, they hold a Back-End Developer certification, further solidifying their foundation in software engineering.*

## EXPERIENCE

### Victory Code

March 2025 - Present

Full Stack Developer

### Reskill Americans, Seattle

March 2021 - October 2021

Backend Dev Student

### Hampton

February 2019 - March 2021

Front Office Supervisor

### N/A

June 2018 - September 2018

Mobile Developer

- I independently worked on a Crypto currency app using React Native to learn about mobile development.

### Moz, Greater Seattle Area

August 2017 - March 2018

Software Engineer Internship

- - ES6, React, Redux, Redux Sagas, Lodash FP. - Mocha/Chai/Unit Testing. - Customers would like to see how much traffic they get from different search engines and in addition, would like to see which pages the search engines are sending them to. With data provided through our API, I was able to build a beautiful UI with charts made in c3js, and sortable, pageable tables. - It's important for SEO to be able to target your webpage for certain search keywords. We built a node microservice using CoffeeScript, to cache (using Redis) and decide which one of two API's to use (similarweb or an internal service) and recommend new keywords that the customer would do well optimizing for. In addition, we consumed the service on our frontend with a table (react/redux) and the ability to add the keywords to the customer's current tracked keywords.

### Tacoma Community College

June 2016 - June 2017

Full Stack Web Development Student

- - Year-long accredited immersive program that focuses on exposure to HTML, CSS, JavaScript, JQuery, JSON, Node, Express, SQL, and React. Used new skill sets immediately during weekly and bi-monthly projects. - Peer mentored 7 classmates and served as point person for design layouts. - Strong passion for front-end development and the magic of React. - Solidified understanding of concepts through whiteboarding.

## EDUCATION

### Reskill Americans

January 2021 - January 2021

Computer Software Engineering

## RECOMMENDATIONS

### Jeremy Modjeska

- As an intern on the Moz Pro frontend engineering team, Alana was quickly immersed in a complex technical ecosystem. She progressively acquired the knowledge and skills needed to autonomously build features for Mozs flagship product suite using modern technologies like React, React Router, Redux, JavaScript ES6, and WebPack. She learned about good development practices like unit testing, code reviews, continuous integration, and multi-tier deployment and release processes. Alana came to Moz following successful completion of the Unloop program, in which she transformed her life, learning to code without internet access or a computer outside of the classroom. I have been humbled by her personal journey and her subsequent advocacy for people with records, including speaking at conferences and advising at the highest county, state, and federal levels on prison reform. I believe Alanas talent, her excitement about software development, and her limitless potential provide ample reason to recommend her to anyone seeking an enthusiastic and hard-working frontend developer. Moreover, Alanas inspiring personal story and passionate advocacy make her an even more compelling hire who play a unique role in building an inclusive and diverse engineering culture.

## CERTIFICATIONS

### Back-End Developer

October 2021 - Present
