Professional Summary

Experienced front-end developer specializing in React and JavaScript, skilled in building responsive, accessible, and high-performance web applications. Proficient in modern UI frameworks and collaborative Agile environments, delivering user-friendly interfaces with a focus on maintainability and scalability.

Experience

Front-End Developer, Victory Code

- Building responsive web applications with Next.js, React, Firebase, and Tailwind CSS.
- Designing and implementing UI components and dashboards that improve usability and engagement.
- Leading front-end integration for new features, collaborating with designers and backend engineers to optimize UX.

Software Engineer Intern, Moz

Aug 2017 – Mar 2018

- Developed React and Redux features for Moz Pro SEO analytics platform.
- Built interactive charts (c3.js) and dynamic tables to visualize SEO data for customers.
- Improved performance by building a Node.js microservice with Redis caching for keyword recommendations.
- Practiced CI/CD workflows, unit testing (Mocha/Chai), and code reviews.

Backend Dev Student, Reskill Americans

Mar 2021 – Oct 2021

- Completed developer certification with projects focused on REST APIs, authentication, and databases.

Front Office Supervisor, Hampton

Feb 2019 – Mar 2021

- Directed operations in a fast-paced environment, strengthening organizational and leadership skills applicable to agile dev teams.

Full Stack Web Dev Student, Tacoma Community College

Jun 2016 – Jun 2017

- Completed year-long program covering HTML, CSS, JavaScript, React, Node, SQL, and Express.
- Mentored 7 peers and led UI design efforts on group projects.
